Summary

I am Abdul Rahman, a recent graduate with a degree in Computer Application from Integral University. I am passionate about Python development and have completed several projects showcasing my skills in object-oriented programming, data structures, algorithms, data visualization, data modeling, data analytics, Python programming, MySQL, critical thinking, and lifelong learning. While I may lack professional experience, I am highly motivated and eager to contribute my expertise to a dynamic team.

Skills

- Proficient in Python programming language, with a focus on object-oriented programming.
- Strong understanding of data structures and algorithms, enabling efficient problem-solving.
- Experienced in data visualization, using tools such as matplotlib and seaborn to communicate insights effectively.
- Skilled in data modeling and analytics, utilizing Python libraries like pandas and NumPy for data manipulation and analysis.
- Proficient in MySQL, enabling efficient database management and query optimization.
- Possess critical thinking abilities to identify and address complex issues in programming and problem-solving.
- Committed to lifelong learning, staying updated with the latest trends and advancements in the field.

Career Highlights

- Developed a major project in Python focused on machine learning-based fake news detection. Leveraged Python libraries such as scikit-learn and natural language processing techniques to build an accurate classifier. This project demonstrated my ability to apply Python programming and machine learning concepts to real-world problems.
- Created a data visualization project using Python and matplotlib, presenting complex data in a visually appealing manner. The project showcased my skills in data representation and storytelling through visualizations.
- Implemented a data modeling project using Python and MySQL, designing an efficient database structure to handle large volumes of data. Employed optimized queries to retrieve and analyze data effectively, showcasing my proficiency in data management.
- Actively participated in online coding competitions and hackathons, consistently ranking among the top performers. These experiences honed my problem-solving skills and fostered a collaborative mindset.

I am excited about the opportunity to apply my skills and contribute to a team where I can continue learning and growing as a Python developer. I am confident that my passion for programming, combined with my solid foundation in computer application, make me a valuable asset for any organization in need of a skilled Python developer.

Education

Integral University, Lucknow, Uttar Pradesh

Bachelor's Degree, Computer application

2020 - 2023

S. R. P. COLLEGE, PATNA

10+2 Board examination, science

2019 - 2020

Gyanasthali high school

10th Board examination, science

2016 - 2017

I have graduated from my 10th board exam with a very good grade.

Skills

Object-Oriented Programming (OOP) • Data Structures • Algorithms • Data Visualization • Data Modeling
• Data Analytics • Python (Programming Language) • MySQL
